# Roles in the Field of Embedded Systems

Embedded systems encompass a broad field that integrates hardware, software, and system-level design. Professionals in this field can specialize in various roles, each with distinct responsibilities.

## 1. Embedded Software Engineer

### Responsibilities:

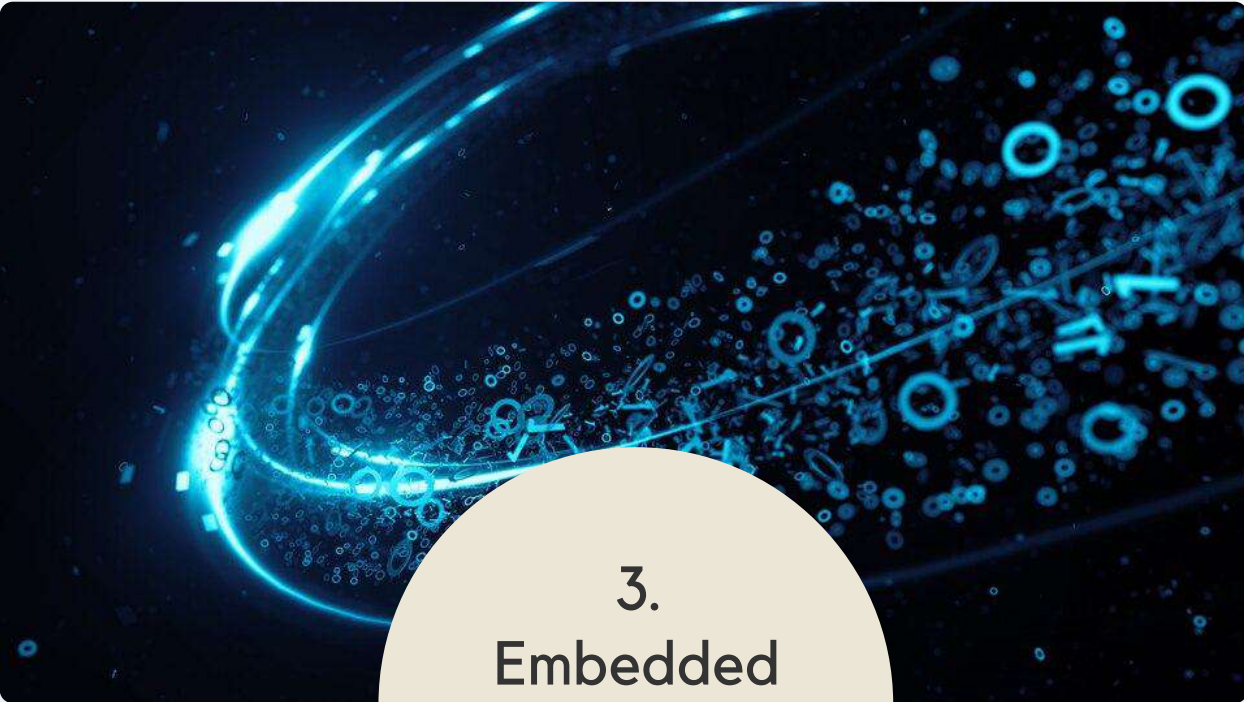

- Develop software that performs specific functions within an embedded system, often running on an operating system like Linux or RTOS (Real-Time Operating System) and bare-metal software in some cases.
- Implement complex system-level applications that might manage or coordinate hardware operations through higher abstraction layers.
- Write code that interfaces with peripherals and other integrated components via high-level programming interfaces.
- Ensure the integration of all software and hardware components, often requiring a good understanding of both systems.
- Optimize software to enhance system performance, including speed and resource usage (e.g., memory efficiency).

## 2. Firmware Engineer

### Responsibilities:

- Develop and maintain the firmware that runs directly on the microcontrollers and processors without any abstraction, ensuring reliable low-level operation of the hardware.
- Write code that initializes hardware and provides fundamental operational control over the system's components, often without the support of a full-fledged operating system.

### 3. Embedded Hardware Engineer

#### Responsibilities:

- Design and develop electronic hardware that meets the requirements of the embedded system.
- Create schematics and oversee PCB layout.
- Select microcontrollers, sensors, and other electronic components.
- Conduct electronic simulations to validate hardware designs.
- Collaborate with software teams to ensure hardware compatibility.

## 4. Test Engineer

### Responsibilities:

- Develop and implement testing protocols for embedded systems.
- Use automated and manual tests to ensure systems meet specifications.
- Analyze test data and report on system performance.
- Collaborate with developers to rectify issues and validate fixes

## 5. Field Application Engineer

### Responsibilities:

- Serve as the technical link between customers and engineering teams.
- Provide technical support and expertise to customers on embedded system products.
- Assist in troubleshooting and resolving issues that arise in customer deployments.
- Conduct training sessions for customers on new products.

## 6. IoT Solutions Architect

### Responsibilities:

Design IoT frameworks and architectures that integrate embedded systems with cloud services.

Develop strategies for data collection, processing, and analysis.

Work with cross-functional teams to deliver comprehensive IoT solutions.

Ensure the scalability and security of IoT systems.

## 7. Embedded Security Engineer

### Responsibilities:

- Design and implement security protocols within embedded systems.
- Conduct vulnerability assessments and manage security testing.
- Ensure compliance with relevant security standards and regulations.
- Develop strategies to mitigate and respond to security threats.

## Our Courses

## ARM Assembly Programming Mastery Pack

Covering ARM Systems Design, Architecture and Practical Assembly Programming, this is the most comprehensive ARM ..

[Learn More](#)

## Bare-Metal C/C++ Learning Path

1. Modern Bare-Metal Embedded-C From Ground Up (STM32F4) : Old and New Edition
2. Modern Bare-Metal ..

[Learn More](#)

## Bluetooth Low Energy (BLE) From Ground Up™

Welcome to the Bluetooth Low Energy (BLE) From Ground Up™ course.

This practical Bluetooth Low Energy ..

[Learn More](#)

## Embedded Ethernet Firmware Development Learning Path

3 Courses | 43+ Courses | Complete Source Included

1. Embedded Ethernet ..

[Learn More](#)

## Embedded Systems IoT Learning Path

3 Courses | 36+ Courses | Complete Source Included

1. Bluetooth Low Energy (BLE) from Ground Up ....

[Learn More](#)

## Embedded Wifi Bare-Metal Development From Ground Up™

Welcome to the Embedded WIFI Bare-Metal Development From Ground Up™ course..

[Learn More](#)

## Extreme Embedded Firmware Engineering Learning Path

3 courses | 44+ hours | Complete Source Code Included

1. Embedded Build ..

[Learn More](#)

## STM32 Development Learning Path

8 Courses | 90+ Courses | Complete Source Included

1. Mastering STM32CubeMX 5 and CubeIDE  
2. Embedded Systems..

[Learn More](#)

## Realtime Operating Systems (RTOS) Learning Path

4 Courses | 47+ hours | Complete Source Included

1. FreeRTOS from Ground Up
2. Arm Assembly Programming..

[Learn More](#)

## STM32F3 Bare-Metal Peripheral Drivers Development

Welcome to the STM32F3 Bare-Metal Peripheral Drivers Programming course ..

[Learn More](#)

## ARM GNU Assembly Programming From Ground Up™

Welcome to the ARM GNU Assembly Programming From Ground Up™ course ..

[Learn More](#)

## Embedded Ethernet Essential Training With CubeMX

This course is the beginner course of a 3 course learning path teaching you how ..

[Learn More](#)

## Embedded Systems Bare-Metal Programming Ground Up™ (STM32F4)

The goal of this course is to teach you how to navigate the microcontroller reference manual ..

[Learn More](#)

## Embedded Systems STM32 HAL APIs Driver Development

Welcome to the Embedded Systems STM32 Hardware Abstraction Layer (HAL) ..

[Learn More](#)

## Embedded Systems STM32 Low-Layer APIs(LL) Driver Development

Welcome to the Embedded Systems STM32 Low-Layer APIs(LL) Driver Development course. .

[Learn More](#)

## ARM Assembly Language From Ground Up™ 2

Welcome to the ARM Assembly Programming Ground Up™ 2 course. With a programming based approach, this course is designed ..

[Learn More](#)

## Mastering STM32CubeMX 5 And CubeIDE - Embedded Systems

Hello Welcome to the Mastering STM32CubeMX 5 and CubeIDE course  
This course teaches you ..

[Learn More](#)

## {C++}Build Your Own Realtime OS (RTOS) From Ground Up™ On ARM

Welcome to the {C++} Build Your Own RTOS From Ground Up™ course.  
This is a C++ version of..

[Learn More](#)

## Embedded System IoT Systems Design

This course teaches you how build a complete Internet-of-Thing (IoT) system from scratch using just your development board ..

[Learn More](#)

## Embedded Systems Bare-Metal Ethernet Programming

This course is the advanced level course of a 3 course learning path teaching you how to ..

[Learn More](#)

## Embedded Systems Cellular Firmware Development(GSM)

This course teaches you how to develop drivers and libraries for adding cellular functionality to your embedded device. This course uses the STM32 ...

[Learn More](#)

## Modern Bare-Metal Embedded C++ Programming From Ground Up™

Welcome to the Modern Embedded C++ Bare Metal course. This is a practical programming ..

[Learn More](#)

## Embedded Systems Design Patterns From Ground Up™

Hello, welcome to the "Embedded Systems Design Patterns " course. This course teaches you how to apply design patterns to embedded firmware development. Design ..

[Learn More](#)

## Embedded Ethernet Programming With HAL

This course is the intermediate level course of a learning path teaching you how to write/configure ..

[Learn More](#)

## Deep Learning On ARM Processors - From Ground Up™

We are going to embark on a very exciting journey together. We are going to learn how to build deep neural networks from scratch..

[Learn More](#)

## Build Your Own RealTime OS (RTOS 1) From Ground Up™ On ARM 1

This course teaches you how to build a Real-Time Operating Systems through intensive ..

[Learn More](#)

## Build Your Own RealTime OS (RTOS 2) From Ground Up™ On ARM 2

Welcome to the Build Your Own RealTime OS (RTOS) From Ground Up™ on ARM 2 course ..

[Learn More](#)

## FreeRTOS From Ground Up™ On ARM Processors

This course teaches you the foundations of real-time systems and how to build real-time applications using FreeRTOS ,one of the most popular real-time ..

[Learn More](#)

## Embedded Systems Object-Oriented Programming In C

Welcome to the Embedded Systems Object-Oriented Programming course. This course is for anyone seeking to improve their ..

[Learn More](#)

## Practical Low Cost Bare-Metal Bluetooth Development

Hello, welcome to the "Practical Low Cost Bare-Metal Bluetooth Development" course. ..

[Learn More](#)

## Embedded Google Cloud <> Python Gateway Communication

Get Ready To Embark On A Transformative Journey With Our Practical Course That

[Learn More](#)

## Modern Embedded GUI With TouchGFX

Introducing Modern Embedded GUI With TouchGFX. This Course Will Equip You With The Skills And Knowledge Needed

[Learn More](#)

## Firmware Version Control With Git From Ground Up™

We shall delve into the world of Version Control Systems (VCS). We start by introducing ..

[Learn More](#)

## USB Host Development Essential Training With CubeMX

This course complements our USB Device Development Essential Training, offering a holistic ..

[Learn More](#)

## WiFi IoT Architecture: From Firmware To Full Stack Web Development

Welcome to the WiFi IoT Architecture course. This course is designed to transform you into a ..

[Learn More](#)

## 4G LTE IoT: Bare-Metal To HTTP, MQTT, SMS

Welcome to 4G LTE IoT: Bare-Metal to HTTP, MQTT, SMS, an immersive journey crafted to transform ...

[Learn More](#)

## Flash Memory And EEPROM Drivers: A Hands-On Guide For Embedded Engineers

Are you an Embedded Engineer looking to master the fundamentals of memory storage and ..

[Learn More](#)

## Advanced Digital Signal Processing On ARM Processors

Welcome to the “Advanced Digital Signal Processing on ARM Processors” course. Whether ..

[Learn More](#)

## Embedded Systems Cryptography & Encryption

In the era of interconnected devices, every micro-bit of data is both an asset and a vulnerability..

[Learn More](#)

## USB Device Development Essential Training With CubeMX

Discover the Art of USB Device Development: Harness the Power of Universal Connectivity

[Learn More](#)

## Embedded Local Database Storage: MySQL

Enter the world of embedded database storage in our new course, "Embedded Local Database Storage: MySQL".

[Learn More](#)

## Embedded Azure Cloud <> Python Gateway Communication

Step into the fascinating world of Microsoft Azure with this practical course designed to empower you to

[Learn More](#)

## Embedded AWS Cloud <> Python Gateway Communication

This course seamlessly merges the realms of embedded systems and Amazon Web Services (AWS) ..

[Learn More](#)

## Embedded Memory Security: Protecting Your System From Tampering And Unauthorized Access

Are you looking to take your embedded systems protection ..

[Learn More](#)

## Custom Cloud <> Python Gateway Communication

Are you ready to redefine the future with IoT without the complexity of wireless radios?

[Learn More](#)

## Embedded Audio Solutions: Developing An Audio Media Player

Welcome to the "Embedded Audio Media Player" course, your quickest way to developing a complete

[Learn More](#)

## Master Firmware Updates With In-Application Programming(IAP)

you an embedded systems enthusiast or a professional engineer looking to level up your skills and

[Learn More](#)

## Embedded Bootloader Development From Ground Up™

Get ready to dive into the exciting world of bootloader development with this beginner level course of our
